Bhaskar Kumar

+91 7667619132 | bhaskarkumar7673@gmail.com | LinkedIn | GitHub | LeetCode | HackerRank

Summary

Aspiring Data Scientist with hands-on experience in data analysis and predictive modeling through internships and real-world projects. Passionate about leveraging **AI technologies** to develop intelligent, data-driven solutions.

Education

- **Jodhpur Institute of Engineering and Technology, Jodhpur, Rajasthan, India** **CGPA: 8.62/10**
  Bachelor of Technology in Computer Science and Engineering | Sept 2023 – March 2027

Experience

Data Science Intern | TechNex **May – July 2025**

- Built ML models (Linear Regression, Random Forest) to predict Netflix movie ratings using genre, watch time and release data.
- Cleaned data and applied feature engineering to boost model accuracy.
- Evaluated models using RMSE, MAE, R^2 — Random Forest performed best.

Research & Product Development Intern | BharatAIOS **May – August 2026**

- Developed responsive dashboards and student management interface.
- Built reusable UI components, enhancing application scalability and maintainability.
- Collaborated with cross-functional teams to analyze requirement and deliver product improvements.
- Utilized GitHub and modern development workflows to support efficient product development.

Technical Skills

- **Languages:** Python, Java, SQL
- **Data Analysis & Visualization:** Pandas, NumPy, Matplotlib, Power BI, Microsoft Excel
- **Machine Learning:** Scikit-learn, TensorFlow, Keras
- **Web Technology:** Flask, HTML5, CSS3, JavaScript
- **Databases:** MySQL, MongoDB
- **Developer Tools:** Git, GitHub, VS Code, Jupyter Notebook
- **Core Concepts:** Data Preprocessing, Feature Engineering, Exploratory Data Analysis (EDA), Deep Learning

Projects

AI-Powered Document Assistant | React.js, Python, FastAPI, RAG, ChromaDB, LLM | GitHub

- Built an AI-powered document Q&A system that uses RAG, ChromaDB, embeddings, and Hybrid Search to retrieve relevant information from uploaded PDFs and generate context-aware answers, tested with up to 20 concurrent documents with second-level response times.
- Developed a React.js frontend and FastAPI backend with document upload, conversational chat, source citations, conversation history, feedback and admin dashboard.

Customer Churn Prediction (ANN) | Pandas, NumPy, TensorFlow/Keras, Matplotlib | GitHub

- Built an Artificial Neural Network model to predict customer churn with 92% accuracy.
- Performed data preprocessing and feature engineering to improve model performance.
- Evaluated model performance using accuracy, precision, recall and confusion matrix.

Smart Farmer Assistant | Python, Flask, MySQL, TensorFlow/Keras (CNN), JavaScript | GitHub

- Built and deployed a CNN-based crop disease classifier via Flask REST API for real-time disease prediction from leaf images.
- Designed MySQL schema and REST APIs for weather forecasting, soil analysis, and market-price analytics using real Agmarknet datasets.
- Applied data preprocessing and recommendation logic for agricultural decision-making, with automated PDF report generation.

Certificates

Azure AI Fundamentals - Microsoft
Machine Learning - Microsoft
Generative AI for Data Science - Coursera
Data Analytics – Tata (Forage)
Python And Java - Infosys
